KINOSERVER

Great FullHD and 4K quality reproduction.

Kino6-R version, through its optical reader, automatically rip any audio and video disc on the highest quality. Also bluray 4K UHD. The "non-R" versions rips audio CDs by connecting an optical USB reader.

It's a server, not a player: just one unit is needed to watch or listen the content in several places, in the house and/or away from home.

Compatible with many players. Smart-tv, apple tv, chromecast, ps3-4, xbox, etc.

It works out-of-the-box. All the software is pre-installed, and pre-configured RAID.

It is wireless. You can put it where you want. (Kino2 excluded)

Simple and fast server setup. It takes only two minutes to be operational. User manual and videotutorial available online.

Customization possible.

Upgradeable. Investment preserved over the time. When other nas become obsolete or break, you throw them.

In the same price range, gives more quality and multiple connections with TRIPLE power compared to NAS (cpu, ram, ssd)

Powerful and complete server grade operative system.

Superior data security (system disk, raid, ZFS)

Kinoserver Manager. Powerful and simple management software.

LiveMonitor. Server monitors itself. You are warned in case of possible problems.

Construction with top quality components. Hand built and tested (24 hours) one by one.

Reliable assistance, even remotely.

Not just audio-video. But also Roon server, ripping station, personal cloud, file server, web server...
